

**Monthly report to Landsort Board by Observatory Wardens:  
Chris Sharpe & Kay Collister  
October 2017**

**Summary**

The first few days had winds from the SE to SW, with the 1<sup>st</sup> producing 263 new birds, continuing the good numbers caught at the end of September. The 4<sup>th</sup> to 11<sup>th</sup> had winds of strong to very strong from the NW, with mainly SW to W winds from 12<sup>th</sup> to 16<sup>th</sup>, remaining strong to very strong. The period 17<sup>th</sup> to 25<sup>th</sup> gave winds mainly from the E to SE with numbers of birds caught increasing as a result. Other than the 19<sup>th</sup> to 20<sup>th</sup> the winds remained strong. From the 26<sup>th</sup> to the end of the month winds from the N to NW dominated, including Gale force winds on the 29<sup>th</sup> and 30<sup>th</sup>.

**Ringling**

All data entered onto Fågel3 and submitted to Ringling Central.

2,960 new birds of 41 species were caught in the month, only the tenth highest October in the 30 years of the Observatory, caused by a combination of very strong winds and what is accepted through the country as a poor breeding season. Nets were opened at SUDD on two dates, producing 54 new birds of 7 species. The year total now stands at 10,053, significantly more (44%) than the 1988-2017 average as at the end of October which stands at 6,993.

Captures of note included:

- 18 Taltrast (Song Thrush) 6<sup>th</sup>;
- The first two of a total of 9 Svartmes (Coal Tit) also on the 6<sup>th</sup>;
- 9 Domherre (Bullfinch) on the 11<sup>th</sup>, the highest day catch for the month;
- A late Trädgårdssångare (Garden Warbler) 12<sup>th</sup>;
- Single Gransångare (*tristis*) (Chiffchaff) on the 17<sup>th</sup> and a further single on the 19<sup>th</sup>;
- Two Varfågel (Great Grey Shrike) 18<sup>th</sup>, with 17 Stjärtmes (Long-tailed Tit) on the same day;
- Single Snösiska (Arctic Redpoll) on 17<sup>th</sup>, 26<sup>th</sup> & 27<sup>th</sup>;
- Single Enkelbeckasin (Common Snipe) 19<sup>th</sup>;
- Single Kungsfågelsångare (Pallas's Warbler) on the 21<sup>st</sup>;
- Hornuggla (Long-eared Owl) 26<sup>th</sup>;
- The highest day catch of the month (291) for Gråsiska (Redpoll) on the 29<sup>th</sup>.

Summaries below are for Bredmar only.

## Birds caught per hour of netting BMAR - October 2017

### Sightings of note during October

Among a range of interesting sightings for the month, mostly covered on the daily diary, or on Artportalen, the following were of note:

- 400 Bofink (Chaffinch) on 5<sup>th</sup> and similar number on 6<sup>th</sup>;
- 200 Grönsiska (Siskin) 5<sup>th</sup>;
- Kungsörn (Golden Eagle) 6<sup>th</sup>
- Sädgås (Bean Goose) *rossicus*, exhausted on 6<sup>th</sup> & 7<sup>th</sup>;
- Two Ladusvala (Barn Swallow) on 6<sup>th</sup>;
- 4,275 Ringduva (Woodpigeon) on 6<sup>th</sup>;
- Two Gröngöling (Green Woodpecker) on 7<sup>th</sup>, followed by singles on 27<sup>th</sup> & 29<sup>th</sup>;
- Two Blå kärrhök (Hen Harrier) on 7<sup>th</sup> with a single on the 10<sup>th</sup>;
- 445 Taltrast (Song Thrush) on 7<sup>th</sup>, the 3<sup>rd</sup> highest ever count in the Stockholm area;
- Bird of the season, a Tajgablåstjärt (Red-flanked Bluetail) 7<sup>th</sup> and 8<sup>th</sup>;
- Nine Varfågel (Great Grey Shrike) on 15<sup>th</sup>;
- Two Tretåig mås (Kittiwake) on 21<sup>st</sup>, with a single on the 22<sup>nd</sup>;
- Three Skärnsnäppa (Purple Sandpiper) on 22<sup>nd</sup>, with a single on 29<sup>th</sup>;
- Approximately 20 Vinterhämpling (Twite) on 22<sup>nd</sup>;
- A single Större korsnäbb (Parrot Crossbill) on 22<sup>nd</sup>;
- Single Dvärgbeckasin (Jack Snipe) on 24<sup>th</sup>;
- Sångsvan (Whooper Swan) tired individual on Bredmar pond on 24<sup>th</sup>. Present on island until months end;
- Single Stenknäck (Hawfinch) on 28<sup>th</sup>;
- A Tobisgrissla (Black Guillemot) on 29<sup>th</sup>;
- Two Snösparv (Snow Bunting) on 29<sup>th</sup>.

### **Other work on the Observatory**

- Final trimming of grass in front of Obs and where bird food is put down;
- All bird bags washed;
- Daily diary blog kept up to date;
- Guided talk given (see later);
- Weekly cash reconciliations undertaken and record kept of over-night stays (see later);
- Writing of work-plan and method statements covering the work of Wardens completed;
- Common areas, toilet, kitchen etc cleaned before and after each weekend;
- Lab cleaned weekly;
- Most nest boxes visited, cleaned and repaired. Just 10 to do before we leave

### **Volunteer work on the Observatory by Chris, Kay & others**

- Some trees removed/ decreased in height to protect nets from damage;
- New lights fitted in kitchen by Mats & Mattias;
- Batteries replaced in smoke detectors by Mats;
- SUDD nets removed and poles taken back to Obs.
