

# Wardens' report to Landsort Fågelstation board

July 2019

Espen Quinto-Ashman & Matt Scragg

## Weather summary

A variable month with some hot and humid days towards the end of the month reaching up to 30°C, but some cooler and windier days too. On the 1<sup>st</sup>, 5<sup>th</sup>, 7<sup>th</sup>, 28<sup>th</sup> and 30<sup>th</sup> no nets were opened due to high wind or rain, and the number of nets opened was restricted by wind on a few other dates.

## Ringling

All data was entered on Fågel3 and submitted to Ringling Central.

A total of 475 birds of 39 different species were ringed as well as 256 subsequent encounters of 23 different species. Like June, July also saw the lowest total of birds ringed compared to the previous four years. The most numerous caught species was the Lesser Whitethroat / Årtsångare with 64 ringed, followed by Tree Sparrow / Pilfink with 57 ringed, the latter again being the only regularly caught species to have increased on previous years. The highest day capture was on 8th when 42 birds were ringed and the lowest was on 17th when 7 birds were ringed.

Less frequently caught species included (with total number ringed at station in brackets):

- Greenish Warbler / Lundsångare (9<sup>th</sup> of season)
- Cuckoo / Gök (22<sup>nd</sup>)

## Sightings of note during July - birds

The Great Reed Warbler (Trastsångare) was still singing at the Bredmar reedbed until 3<sup>rd</sup> and the Greenish Warbler (Lundsångare) was still stinging at Våta Vägen until late in the month, a juvenile of the latter species was ringed on 10<sup>th</sup>. Both Green and Black Woodpecker (Gröngöling and Spillkråka) were recorded around Bredmar mid-month, with the former still being encountered sporadically until the end of the month. Cuckoos (Gök)

were recorded on 26<sup>th</sup> and 30<sup>th</sup> and two Peregrines (Pilgrimsfalk) flew over on 29<sup>th</sup>. Also of note was a Moose (Älg) which has been encountered occasionally around the island since 16<sup>th</sup>.
